EDUCATION

New York University

Aug 2019 – May 2023

B.S. in Computer Science, Minor in Mathematics (GPA: 3.78/4.00)

Abu Dhabi, UAE

- Relevant Coursework: DS & Algorithms, Operating Systems, Computer Networks, Databases, Computer Security

Georgia State University

Aug 2025 – Dec 2026

M.S. in Computer Science (GPA: 4.10/4.30)

Atlanta, Georgia

- Relevant Coursework: Machine Learning, Deep Learning, Computer Vision, Mobile App Development

EXPERIENCE

Software Engineer Intern

May 2026 – Aug 2026

Uber(Java Platform)

San Francisco, California

- Built an LLM-powered monitoring pipeline using JFR telemetry to detect subtle regressions across critical Java services
- Reduced LLM context and inference cost by >95%, compressing ~43K JFR data tokens to ~2K through visualization
- Automated root-cause analysis by correlating service logs and deployment diffs, replacing hours of manual investigation
- Integrated slack alerts to deliver service reports, helping owners and on-call engineers triage subtle regressions faster

Research Engineer

Nov 2023 – Aug 2025

New York University

Abu Dhabi, UAE

- Developed RAG pipelines integrating retrieval models with LLMs, achieving ~80% accuracy on complex search queries
- Co-developed a large-scale graph visualization tool enabling 10K+ node exploration for social-network analysis
- Reduced Docker image size by ~35% using multi-stage builds, improving deployment speed and lowering AWS costs
- Automated docker container restarts with bash scripts, preventing ~20 hrs of downtime per month

Software Engineer Intern

Aug 2022 – Dec 2022

Center for Interacting Urban Networks, NYU

Abu Dhabi, UAE

- Co-developed an interactive dashboard providing 20K+ students across Abu Dhabi schools with air quality insights.
- Built CI/CD pipelines using CircleCI to automate testing and deployment, reducing deployment time by ~80%
- Migrated graph data from AWS Neptune to Blazegraph, cutting AWS costs by \$200 per month
- Refactored codebases to remove redundant packages, cutting build time ~10% and improving maintainability

Software Engineer Intern

May 2022 – Aug 2022

LinkedIn (FLIP-API Team)

Sunnyvale, California

- Built a backend service using Flask to significantly accelerate on-call engineers' response to deployment issues
- Implemented a singleton database class to manage SQL connections significantly reducing connection overhead
- Achieved ~98% test coverage with Pytest unit and integration tests, ensuring API reliability and stability
- Delivered regular sprint progress updates, enabling 10× faster iteration through rapid feedback loops

PROJECTS

BuukEasy (buukeasy.com) | *Next.js, PostgreSQL, Tailwind CSS, Ziina*

- Built full-stack booking platform with secure payments and mobile-first UI for solo beauty and wellness professionals
- Launched MVP with booking and payment features; serving 5 clients and expanding with new features

FoodRunner | *Flutter, Dart, Firebase, Google Maps*

- Built a multi-platform food delivery application connecting customers, restaurants, and delivery drivers
- Implemented real-time order tracking and proximity-based driver assignment using Firebase and geolocation services

TECHNICAL SKILLS

Languages: Python, C++/C, Java, JavaScript, TypeScript, SQL, Go, Dart

Frameworks/Libraries: React, Node.js, Flask, Pytest, JUnit, PyTorch, LangChain, LangGraph

Tools/Databases: PostgreSQL, MongoDB, Docker, CircleCI, Buildkite, Git, Bazel, AWS
