Education

Georgia State University

M.S. in Computer Science

Expected May 2027

Atlanta, Georgia

New York University

B.S. in Computer Science, Minor in Mathematics(3.78/4.00)

Aug. 2019 – May 2023

Abu Dhabi, UAE

- Capstone Project - Enhancing Text-to-Code Translation of GPT-J-6B

Experience

Center for Interacting Urban Networks

Software Engineer

Nov 2023 – May 2025

NYU Abu Dhabi, UAE

- Developed retrieval-augmented generation (RAG) systems by integrating dense retrieval with LLMs, achieving **~80%** accuracy in answering complex queries across tabular and textual datasets
- Leveraged multi-stage Docker builds to reduce image sizes by **~35%**, optimizing resource usage and deployment efficiency on AWS
- Coordinated the incremental transfer of 500+ GB of data from AWS to NYU servers with **100%** data integrity and zero downtime
- Created a biweekly cron job that runs a custom bash script to restart up to 15 Docker containers affected by scheduled maintenance, preventing an average of 8 hours of downtime per month

Center for Interacting Urban Networks

Software Engineer(Part Time)

Mar. 2022 – May 2023

NYU Abu Dhabi, UAE

- Engineered a react-based visualization dashboard to analyze and display air quality data, improving the center's and stakeholder access to environmental insights
- Implemented a CI/CD pipeline using CircleCI and deployed the application on GitHub Pages, reducing manual deployment overhead by **100%**
- Optimized frontend performance, improving page load times by **~28%**, which significantly enhanced user experience and engagement
- Refactored and streamlined the codebase by removing redundant packages, cutting build time by **~22%** and improving maintainability

LinkedIn Corporation

Software Engineer Intern

May 2022 – August 2022

Sunnyvale, California

- Designed and implemented an end-to-end reporting service using Flask to assist on-call engineers in triaging deployment issues, projected to boost engineering productivity by **~30%**
- Wrote optimized SQL queries to extract and persist deployment pipeline data into a MySQL database, enabling real-time issue tracking and analysis
- Achieved **~98%** code coverage by writing comprehensive unit and integration tests with Pytest, ensuring reliability and stability across all API endpoints
- Actively participated in weekly stand-ups and sprints, consistently delivering progress updates and contributing to the team's agile development cycle.

Projects

Kosmograph | *Next.js, MaterialUI, Docker*

- Built Kosmograph, a scalable graph visualization tool with an interactive UI using Next.js and Material-UI, enabling users to explore large graphs with over 10,000+ nodes.
- Containerized the application with Docker, enabling seamless deployment, efficient resource management, and consistent development and production environments

LinkedNYU | *React, Express.js, MongoDB, CircleCI*

- Led a team of four to build a social platform for NYU students using React, Express.js, and MongoDB; internally tested the MVP with a small group of users.
- Streamlined development by integrating a CI/CD pipeline using CircleCI, automating unit tests and deployment to Digital Ocean.

Technical Skills

Languages: Python, C++/C, Java, Go, HTML/CSS, JavaScript, SQL

Developer Tools: VS Code, Git, Github

Technologies/Frameworks: React, Next.js, Node.js, MongoDB, Docker, Kubernetes, Flask, CircleCI, Redis, AWS
